## AIR VIRUS KILLER

Despite our best efforts to keep our home and working environments clean, both are only as clean as the air that we breathe. Indoor air has been proven to be up to five times dirtier than what we breathe outside, exposing us to harmful viruses, bacteria, and other impurities, including pollen, dust mites, moulds, and germs.

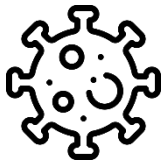

### Introducing, the revolutionary **Vibian Air Virus Killer**.

The **Vibian Air Virus Killer** is grounded in science using cutting-edge clean air technology and bi-polar ionisation to kill harmful pathogens and purify the air that we breathe.

Despite its elegant, non-obtrusive compact design, the Vibian Air Virus Killer is a powerhouse, producing 180 million positive and negative ion per cm<sup>3</sup>, effectively killing viruses and other pathogens within 30 minutes, for rooms between 10m<sup>3</sup> to 80m<sup>3</sup>.

The **Vibian Air Virus Killer** has been independently tested and accredited by leading laboratories to effectively kill **Sars-Covid 2, H1N1 & Mrsa**.

The **Vibian Air Virus Killer** can be installed in less than a minute and is maintenance free. Simply switch on, and the Vibian Air Virus Killer goes to work quietly and efficiently in the background, allowing you to have peace of mind, that you, and your loved ones are, safe

#### **KILLS VIRUSES AND BACTERIA**

Reduces pathogens up to 99,9%

#### **TESTED BY CERTIFIED LABS**

Kills SARS-COVID 2, H1N1, Mrsa

#### **NO MAINTENANCE**

Maintenance free and simple installation, standalone

#### **AIR PURIFIER**

Breath fresh, clean air

## Unique Features of the Vibian Air Virus Killer

- The Air Virus Killer is grounded in science and engineered like no other
- Certified and accredited by independent laboratories to kill 99,9% of Sars-Covid 2, H1N1 and Mrsa viruses
- Industry leading fan design allows the flow of 180 million bi-polar ions per cm<sup>3</sup> into the air
- Delivers 4 times as many ions per devise to make your environment safe
- Sterilises air for rooms between 10m<sup>3</sup> to 80m<sup>3</sup> within 30 minutes
- Elegant, non-obtrusive design that stylishly harmonises with the aesthetics of your home or workplace
- Maintenance free: The Air Virus Killer doesn't use filters unlike the products of almost all competitors. This saves yearly maintenance cost around €200 per year
- Easy plug and play installation
- 10 hour built in timer to switch device on/off
- Certified Ozone Friendly
- Quiet and energy efficient
- Scientifically proven to extend shelf life of fresh food products
- Available in 2 different models and 3 different colours

### Unique Features of the Vibian Air Virus Killer

Independently tested and certified by leading microbiology laboratories in both the US and PRC.

#### Certified results of removal rate:

Harmful Substances	Types	Reduction Rate	Year
Viruses	SARS-COVID-2	99,90%	2021
Viruses	H1N1 Flu Virus	99,90%	2021
Bacteria	MRSA	99,90%	2021
Ozone	The percentage of ozone on the room shall not exceed 5x10 <sup>-6</sup> (FDA approved rate of 0,05ppm)	Max ozone concentration recorded: 2.1x10 <sup>-6</sup> (0,021ppm)	2021

#### Scientifically recognised removal rate:

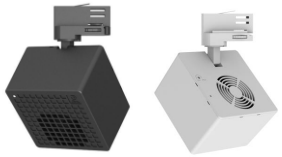

Harmful Substances	Types	Reduction Rate
Bacteria	Escherichia coli ATCC 8739	99,90%
Bacteria	Staphylococcus aureus	99,90%
Bacteria	Staphylococcus albus	99,90%
Fungi		99,90%

## How it works

The Air Virus Killer's bi-polar ions are made from the same type of positive and negative ions that occur in nature. Plasmacluster ions are naturally occurring airborne water and oxygen, but in a different form.

The Air Virus Killer's bi-polar technology generates 180 million positive hydrogen ions (H+) and negative oxygen ions (O<sub>2</sub><sup>-</sup>) per cm<sup>3</sup>, which work in conjunction with the Plasmacluster ions and attach to the surface of the airborne viruses and other substances and change into OH radicals. The surface of viruses, bacteria and allergens are mainly comprised of protein. With their extremely strong oxidising power, the OH radicals quickly extract hydrogen (H) from the protein on the surface of viruses and other pathogens, thus decomposing the protein and suppressing activity.

By removing the hydrogen atom (H) from the structure of viruses, bacteria and allergens, the undesirable substances become inactive. Finally, the OH radical bonds with the removed hydrogen atom (H) to immediately form water (H<sub>2</sub>O), which is returned to the air creating clean fresh air.

Table of average ion values			
The lower the value of negative ions, the greater the risk of polluted air.			
Air type	Negative ions	Positive ions	Total
Clean mountain air	2000	2500	4500
Ordinary air	1500	1800	3300
Office air	150	200	350
Closed vehicle	50	150	200
Specifications			
Product	Product Code	image	
Vibian Air Virus Killer White	ABLATUM - VB211002B / ABLATUM - VB211002W		
Vibian Air Virus Killer Black	ABLATUM - VB211003B / ABLATUM - VB211004W		

# Additional benefits of the Air Virus Killer

There are many scientific and research findings on the additional benefits of air purification.

These includes:

- Reduction in respiratory related problems. Cleaner air allows us to breathe easier and alleviates allergies, coughs and even asthma.
- Negative ions are believed to produce biochemical reactions that increase levels of the mood chemical serotonin, helping to alleviate depression, reduce headaches, relieve stress, and boost our physical energy.
- Better sleep. Due to the positive effects in normalising serotonin production in the brain, negative ions can assist to get a better quality of sleep.
- Negative ions increase your sense of well-being and mental clarity by counteracting debilitating positive ions in your environment. They have been described as a natural anti-depressant.
- Elevated mental concentration and performance. Testing has regularly shown that subjects exposed to high levels of anions perform better in mentally challenging tasks than those breathing normal positive ion dense air. Simply put, the increased flow of oxygen to the brain, can increase mental ener

GENERAL CHARACTERISTICS	
Case Material	Polycarbonate and ABS
Fan	Adjustable speed
Ionisers	4 pieces Bi-Polar -3.5kV - +3,5kV total 180 million ions per cm <sup>3</sup>
Recommended capacity	Purifies 10m <sup>3</sup> -80m <sup>3</sup>
Virus air cleaning rate	Up to 99.9% effective
Ion degradation	Alter 11,000 - 19,000 hrs ION production will slowly degrade
Installation	via supplied stand/wall mount/phase track/recessed ceiling
Operating temperature	5°C -+50°C
Colours	White (W), Black (B)
Blue indicator LED	In operation

TECHNICAL CHARACTERISTICS VB211001 & VB211002	
Voltage Input	220-240V-, 50/60Hz, Class II
Power Consumption	5Watt / 0005kWh
3 way on/off switch	Function includes On/Off timer
Timer	10-hour adjustable timer
Power Cable	1.8 meters
Noise Level	< 10dB

TECHNICAL CHARACTERISTICS VB211003& VB211004	
Voltage Input	220-240V-, 50/60Hz, Class II
Power Consumption	5Watt / 0005kWh
Only Rail	3-phase 4 wires track adapter
Noise Level	< 10dB

DIMENSIONS	
L x H x D in cm	10.5 x 10.5 x 7.5 cm
Weight	0.5 kg
Packaging	Cardboard box
Box L x H x D in cm	18 x 18 x 18 cm
Quantity	1 pcs
